Recommended Installation by a Professional Plumbing Contractor

Note: The use of petroleum base plumbers putty on our products will nullify the warranty. We recommend the use of clear silicone sealing materials. Recommended deck thru hole Ø 1-3/8" to 1-5/8".

1. Insert hoses through deck hole one at a time, and secure spout into place with MOUNTING STUD, MOUNTING BRACKET and MOUNTING NUT.
For 1203 & 1233 secure spout into place with MOUNTING KIT. **See Figure 1.**
2. Attach hot/cold spout supply hoses to valves in the wall. **See Figure 2.**
3. Drain assembly not included with 1203-1. Remove FLANGE, RUBBER WASHER, STEEL WASHER, and discard drain CAP COVER from drain assembly. Place RUBBER WASHER into FLANGE. Then, place FLANGE through the sink hole (Clear silicone may be used in place of RUBBER WASHER). From underside of sink, install CONE WASHER, STEEL WASHER, and LOCK NUT into FLANGE. Thread LOCK NUT firmly. Thread TAILPIPE to FLANGE assembly and assemble TAILPIPE to existing P-Trap. **See Figure 3.**
4. Remove aerator from spout using key supplied. Turn on water supply, and flush system until water is clear. Check for leaks and make any final adjustments required. Re-attach aerator to the spout.
